

## SOFTWARE TEST ANALYST

### OUTLINE OF POSITION:

Work closely with developers and product owners throughout the development process to define, implement and execute system tests.

### DEFINE JOB ACTIVITIES:

- All aspects of test planning (including formal reviews, analysing requirements and creating test cases).
- Creation and maintenance of manual and automated testing scripts.
- Executing test cases and accurately reporting results and progress.
- Reporting, assigning and tracking resolution of software issues.
- Testing defects and providing sign-off or recommending remedial action.

### SKILLS/ABILITIES REQUIRED:

- Have full life cycle testing experience.
- Have an IT degree (or equivalent) or an ISEB accreditation (or equivalent).
- Experience of automated testing tools and techniques.
- Experience using .NET and SQL Server 2005/2008.
- Change control and test automation tools and practices (JIRA and Test Complete or similar).
- Version control tools and practices (Perforce or similar).
- Methodical with a keen attention to detail.
- Strong analytical and problem solving skills.

### LOCATION: Manchester, England
